

Job Posting: Packaging Engineer for Process Engineering Consulting

Harper & Vedel are seeking junior as well as senior candidates to positions in our Process Engineering Consultancy business (Pharma/Food ingredients/Nutraceuticals production).

We are looking for talented Packaging Engineers for projects in development and implementation of new packaging equipment and packaging production lines.

Who we are:

At Harper & Vedel we support large, well known, clients (mainly in Scandinavia) in areas such as:

- Decision science and support.
- Process design and technology selection.
- Optimisations of current production operations.
- Client-side engineering in revamps and green field projects (CapEx).

Our offices are in the Greater Copenhagen area, close to many of our clients.

We are looking for:

We expect the candidates to fulfil the criteria below:

- Completed B.Sc., M.Sc., or Ph.D. in Chemical Engineering (technical), Mechanical Engineering, Biotechnical Engineering, Pharmaceutical Design and Engineering or similar.
- Strong analytic skills and ability to structure open ended tasks.
- Strong communication skills and ability to formulate complex topics and results in reports and presentations.
- Ability to work independently, delivering quality on time in high profiled projects with many stakeholders.
- Some (preferable 2+) years of industrial experience in Pharma and/or Life Science sector
- Experience and interest within following topics:
 - Primary and Secondary Packaging Materials
 - Labelling and packaging processes from development to commercial production
 - Good Manufacturing Practices (GMP)
 - Technical design, risk analysis, design reviews
 - Validation of processes and equipment from commissioning to qualification (FAT/SAT/IOQ/PQ)
 - Information Technology and Operational Technology (IT/OT) in packaging production environment including serialization.
 - Evaluation of packaging systems; Container Closure Integrity tests, transportation tests and other quality testing.
 - Optimization and standardization
- Oral and written proficiency in English.
- Working professional proficiency in Danish (oral) – preferably also written is an advantage – but not mandatory.
- Interest in the application of technical knowledge as a specialist services business.

At Harper & Vedel we offer:

- Attractive compensation plan including an analytic bonus system.
- Flexible working conditions.
- A flat and dynamic organisation with many possibilities to influence your own job.
- On the job training by leading specialists and experts.
- A highly skilled pool of colleagues.
- Opportunity to be part of some of the most interesting projects and activities in the market segment.
- Performance based career opportunities.

If interested, please submit CV and short cover letter to lene.holmskov@harper-vedel.com or contact me for more information (+45 2614 2350).
